Junior Backend Developer | Node.js Developer | Express.js | REST APIs | MongoDB | PostgreSQL

PROFESSIONAL SUMMARY

Backend-focused Junior Software Developer with hands-on experience building RESTful APIs, authentication systems, role-based access control, and database-driven applications using Node.js, Express.js, MongoDB, PostgreSQL, Python, and Django. Completed a Backend Developer Internship at Genese Solution, where I contributed to backend modules, testing workflows, and automation tools. Strong interest in server-side development, API architecture, database design, and scalable backend systems. Seeking Junior Backend Developer / Node.js Developer / Software Engineer opportunities.

Technical Skills

Backend: Node.js, Express.js, REST APIs, Authentication, Authorization, RBAC, CRUD Operations, Middleware
Databases: MongoDB, PostgreSQL, Supabase, Mongoose, Database Schema Design
Languages: JavaScript (ES6+), Python
Frameworks/Libraries: Django, React.js (Basic)
Tools/Platforms: Git, GitHub, Postman, MongoDB Atlas, Render, Vercel, BeautifulSoup, Requests
Core Concepts: MVC Architecture, Protected Routes, CORS, Environment Variables, JSON, HTTP, Cookies, Deployment Debugging

Work Experience

Backend Developer Intern

Genese Solution Pvt. Ltd. — Lalitpur, Nepal
June 2025 – September 2025

- Contributed to backend development tasks for internal and client-facing projects using Python and Django.

- Worked on Austin Intelligence, a web-based technology analysis platform that detects frameworks, databases, tools, and infrastructure used by websites.
- Helped test and improve backend modules, API-related logic, and scanning workflows in a real-world development environment.
- Developed Genbol, a notice scraping and automation tool using BeautifulSoup and Requests for structured data extraction.
- Collaborated in a team environment using Git-based workflows and gained practical exposure to the software development lifecycle.

Projects

Task Flow – Backend-Focused Task Management Platform

Tech Stack: Node.js, Express.js, MongoDB, React.js, Tailwind CSS, JWT
GitHub: github.com/ujwal284/TaskFlow-Full-Stack-Task-Management-App
Live Demo: task-flow-full-stack-task-managemen.vercel.app

- Built a complete RESTful API for task and user management.
- Implemented JWT-based authentication with protected routes.
- Added role-based authorization for Admin and Normal User access.
- Developed backend logic for:
  - user registration/login
  - task creation/update/delete
  - task filtering and status tracking
  - admin-only monitoring APIs
- Structured backend using route/controller/model separation.
- Solved production deployment issues involving CORS, environment variables, and API integration.

Portfolio Website

Tech Stack: React.js, Tailwind CSS, Vercel

GitHub: github.com/ujwal284/Portfolio_
Live Demo: ujwalrajkhanal.com.np

- Designed and deployed a personal portfolio website to showcase projects, technical skills, and backend profile.
- Built a responsive project showcase with GitHub, LinkedIn, and contact integration.

Store API

Tech Stack: Node.js, Express.js, MongoDB
GitHub: github.com/ujwal284/Store-Api

- Built a backend API for an e-commerce-style application.
- Developed product routes, authentication logic, and order workflows.
- Implemented CRUD operations and structured API route handling.

Task Manager API
Tech Stack: Node.js, Express.js, MongoDB
GitHub: github.com/ujwal284/Task-Manager-Api

- Developed a backend task management API focused on CRUD operations and route handling.
- Built RESTful endpoints and integrated database functionality.
- Tested API endpoints using Postman.

Genbol – Notice Scraping Automation Tool
Tech Stack: Python, BeautifulSoup, Requests

- Developed a web scraping tool to extract and organize notices dynamically from websites.
- Automated structured data extraction to improve repeatability and reduce manual effort.

Certifications

Bridging the Gap Program – AWS Cloud Fundamentals

Genese Technology and Excellence Center (GTEC)

January 2025 – May 2025

- Completed structured training in AWS Cloud Fundamentals
- Gained hands-on exposure to modern cloud concepts and technical workflows

Education:

Name, Place and Country	Attended From/To		Degrees and Academic	Main Course of Study
University of Northampton, Nami College	2023	2025	Bachelor of Computing	Computer Communications, Computer Systems, Operating System, Systems Design & Development, Cyber Security and Cryptography, Artificial Intelligence Techniques, Software Engineering, Web Programming, Database, Mobile App Development.
National Examination Board	2021	2022	Plus, Two (+2)	English, Account, Economics, Computer Science
National Examination Board	1999	2020	Secondary Education Examination (Grade 10)	English, Nepali, Math, Science, Office Management & Account.
