Professional Summary

Full Stack Software Engineer with practical experience designing, developing, testing, and deploying modern web applications using React, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS, and Python. Experienced in building secure REST APIs, authentication systems, responsive user interfaces, and scalable database-driven applications. Completed a Software Developer Internship at Genese Solution where I contributed to backend development, automation tools, and testing workflows. Additionally served as IT Head at StockArts Securities, overseeing networking, IT infrastructure, system administration, troubleshooting, and end-user support. Passionate about solving real-world business problems through clean, maintainable code and continuously learning modern technologies.

Technical Skills

Languages: JavaScript (ES6+), Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Authorization, RBAC

Databases: MongoDB, PostgreSQL, Supabase

Tools: Git, GitHub, Postman, Vercel, Render, MongoDB Atlas

Concepts: MVC Architecture, API Integration, Responsive Design, Deployment, CORS, JSON, HTTP

Professional Experience

IT Head – StockArts Securities (Jan 2026 – Present)

- Manage organization's IT infrastructure, networking devices, computers and software systems.
- Troubleshoot hardware, software and network issues to minimize downtime.
- Maintain system security, backups and routine maintenance.
- Provide technical support to employees and coordinate with external vendors.
- Ensure reliable day-to-day IT operations and infrastructure availability.

Backend Developer Intern – Genese Solution Pvt. Ltd. (Jun 2025 – Sep 2025)

- Contributed to backend development using Python and Django for client and internal projects.
- Worked on Austin Intelligence platform to improve backend modules and scanning workflows.
- Developed Genbol automation tool using BeautifulSoup and Requests.
- Collaborated with developers using Git and participated in testing and debugging.

Projects

GharFix (Beta)

Built a full-stack marketplace connecting customers with service professionals using React, Node.js, Express.js, MongoDB and Tailwind CSS. Implemented authentication, responsive UI, service listings and production deployment.

Task Flow

Developed a full-stack task management platform with JWT authentication, role-based authorization, CRUD operations, REST APIs and responsive frontend.

Store API

Created a scalable e-commerce backend featuring authentication, product management and RESTful APIs.

Portfolio Website

Designed and deployed a responsive developer portfolio showcasing projects, skills and contact integration.

Education

Bachelor of Science (Honours) in Computing (Software Engineering)

University of Northampton (via NAMI College)

2023 – 2025

Core Strengths

• Full Stack Development • Problem Solving • Team Collaboration • REST API Development • Database Design • Responsive Web Applications • IT Infrastructure Management • Continuous Learning
