Junior Backend Developer | Node.js & Express.js Developer | REST API & MongoDB

PROFESSIONAL SUMMARY

Backend-focused Junior Software Developer with hands-on experience building RESTful APIs, authentication systems, role-based access control, database-driven applications, and backend workflows using Node.js, Express.js, MongoDB, PostgreSQL, and Django. I completed a 3-month internship at Genese Solution, where I contributed to real-world backend projects and web automation tools. Built and deployed full-stack applications with a stronger focus on server-side development, API architecture, database design, and backend logic. Currently seeking Junior Backend Developer / Node.js Developer / Software Engineer opportunities.

Technical Skills

Backend Development

- Node.js
- Express.js
- REST API Development
- Authentication & Authorization
- Role-Based Access Control (RBAC)
- CRUD Operations
- API Testing with Postman

Databases

- MongoDB
- PostgreSQL
- Supa base
- Mongoose
- Database Schema Design

Programming Languages

- JavaScript (ES6+)
- Python

Frameworks & Libraries

- Django
- React.js *(basic / supporting knowledge)*

Tools & Platforms

- Git & GitHub
- Postman
- Render
- Vercel
- MongoDB Atlas
- Beautiful Soup
- Requests

Web / Core Concepts

- MVC Pattern
- Middleware
- Environmental Variables
- CORS Handling
- Protected Routes
- JSON / HTTP / Cookies
- Deployment & Production Debugging

Work Experience

Backend Developer Intern

Genese Solution Pvt. Ltd. – Lalitpur, Nepal

June 16, 2025 – September 18, 2025

- Contributed to backend development tasks for internal and client-facing software projects using **Python/Django**.
- Worked on **Austin Intelligence**, a web-based technology analysis platform that detects frameworks, databases, tools, and infrastructure used by websites.
- Helped test and improve backend modules, API-related logic, and scanning workflows in a real-world development environment.
- Built **Genbol**, a notice scraping and automation tool using **BeautifulSoup** and **Requests**, improving structured information extraction from websites.
- Collaborated with developers in a team environment using Git-based workflows and gained practical exposure to software development lifecycle practices.

Projects

Task Flow – Backend-Focused Task Management Platform

Tech Stack: Node.js, Express.js, MongoDB, React.js, Tailwind CSS, JWT, Render, Vercel
A Jira-inspired full-stack task management application built with a strong focus on backend architecture, authentication, API design, and role-based access control.

Key Backend Features:

- Built a complete RESTful API for task and user management.
- Implemented JWT-based authentication with protected routes.
- Added role-based authorization for Admin and Normal User access.
- Designed backend logic for:
  - user registration/login
  - task creation/update/delete
  - task filtering and status tracking
  - admin-only user/task monitoring
- Developed admin APIs for:
  - viewing all users
  - viewing all tasks
  - updating user roles
  - deleting users safely
- Structured backend using clean route/controller/model separation.
- Integrated MongoDB Atlas for cloud database storage.
- Solved real-world issues during deployment such as:
  - CORS
  - environment variables
  - production API URL handling
  - frontend-backend communication
- Deployed successfully in production.

Live Demo: https://task-flow-full-stack-task-managemen.vercel.app/

Portfolio Website

Tech Stack: React.js, Tailwind CSS, Vercel
Designed and deployed a personal portfolio website to showcase projects, technical skills, and developer profile.

Highlights:

- Built a responsive project showcase site
- Added GitHub / LinkedIn / contact integration
- Used to present deployed full-stack and backend projects professionally
- Deployed for recruiter and portfolio visibility

Live Demo: https://ujwalrajkhanal.com.np/
GitHub: https://github.com/ujwal284/Portfolio_

Austin Intelligence

Tech Stack: Python, Django
I worked on a backend-driven web platform during internship that analyzes websites to identify technologies, frameworks, databases, and infrastructure patterns used by target domains.
Contributions:

- Supported backend-related logic and testing
- Worked with real-world project architecture in Django
- Gained exposure to production-oriented engineering practices

Genbol – Notice Scraping Automation Tool

Tech Stack: Python, BeautifulSoup, Requests
Developed a web scraping system to extract and organize notices dynamically from websites.
Features:

- Automated structured notice extraction
- Parsed HTML content and collected useful data
- Improved repeatability of information retrieval workflows

Store API

Tech Stack: Node.js, Express.js, MongoDB
Built a backend API for an e-commerce-style application.
Features:

- Product routes
- user authentication
- order handling
- CRUD operations
- API route structuring

Task Manager API

Tech Stack: Node.js, Express.js, MongoDB
Developed a backend task management API focused on CRUD operations and route handling.
Features:

- Task creation and management
- RESTful endpoints
- database integration
- API testing with Postman

Certifications / Training

Bridging the Gap Program — AWS Cloud Fundamentals

Genese Technology and Excellence Center (GTEC)

January 2025 – May 2025

- Completed structured training in **AWS Cloud Fundamentals**
- Gained **hands-on technical exposure** and practical foundational knowledge in modern cloud technologies
- Strengthened technical and professional skills relevant to software development and cloud environments

Date & Place of birth: 2060-06-18(October 05,2003), Kathmandu, Nepal

Education:

Name, Place and Country	Attended From/To		Degrees and Academic	Main Course of Study
University of Northampton, Nami College	2023	2025	Bachelor of Computing	Computer Communications, Computer Systems, Operating System, Systems Design & Development, Cyber Security and Cryptography, Artificial Intelligence Techniques, Software Engineering, Web Programming, Database, Mobile App Development.
National Examination Board	2021	2022	Plus, Two (+2)	English, Account, Economics, Computer Science
National Examination Board	1999	2020	Secondary Education Examination (Grade 10)	English, Nepali, Math, Science, Office Management & Account.
